Professional Profile

Backend-focused Software Developer with hands-on experience building, deploying, and maintaining production-ready web applications using **ASP.NET Core** and **Laravel (PHP)**. Strong background in designing scalable MVC architectures, RESTful APIs, authentication and authorization systems, and database-driven business logic.

Developed and deployed a **multi-application Laravel recruitment platform** consisting of an employer back-office and a job applicant system, hosted on **Laravel Cloud**. Implemented automated **CV analysis using the ChatGPT API**, with applicant documents securely stored in **Laravel Cloud object storage** for processing and review.

Possess a solid computer engineering foundation covering operating systems, data structures, and distributed web systems. Highly adaptable, detail-oriented, and eager to contribute to engineering teams building reliable, maintainable backend solutions.

Technical Skills

Backend & Frameworks

- ASP.NET Core, Web API, MVC, Razor Pages
- Laravel 12, PHP 8.2, Eloquent ORM, Blade
- RESTful API design
- Authentication & Authorization (Fortify, Laravel Breeze, RBAC)

Databases

- PostgreSQL, MySQL, MariaDB, SQLite
- Eloquent ORM
- Entity Framework Core
- Database migrations, seeders, and relationships

Frontend & Tooling

- HTML5, CSS3
- Tailwind CSS
- JavaScript
- Vite, npm

Cloud & DevOps

- Laravel Cloud (deployment, hosting, object storage)
- AWS EC2, Railway
- Git, Composer

Real-Time & Asynchronous Processing

- Pusher
- SignalR Messaging

Software Engineering

- Design Patterns
- Data Structures & Algorithms
- Secure coding practices
- API integration & third-party services

Experience

4/2026 – 1/2027 Trainee - UCASTI Elancer (Laravel track)

- This program covers advanced Laravel Topics and hands on experience working on an actual project with direct supervision from Eng. Mohammed Safidi.

3/2025 – 5/2025 Intern - Microsoft Power Platform, UNRWA

- Worked on automating workflows and creating data-driven applications using Power Apps and Power Automate.
- Collaborated with a technical team to design low-code solutions for internal operations.
- Assisted in integrating Microsoft services to improve data accessibility and reporting.

Certifications

- Microsoft Power Platform Training (UNRWA Internship)
- TOEFL iBT – 5.0/6.0

Notable Projects

Job Recruitment Platform (Laravel Ecosystem)

Employer Back-Office Application (Laravel)

- Built a full-featured **Laravel 12** back-office system for managing companies, job listings, categories, and applications.

Job Applicant Application (Laravel)

- Developed a separate Laravel-based application dedicated to **job seekers**, enabling users to browse jobs, submit applications, and track application status.
- Integrated **ChatGPT API** to automatically analyze applicant CVs and extract insights for recruiters.
- Stored applicant CV files securely using **Laravel Cloud object storage**.

Applicant Tracking System (ATS)

- Built a system that analyzes candidate CVs against job descriptions using **Power Apps** and **Power Automate**.

Freelance Project Management System

- Developed a lightweight web application enabling freelancers and clients to collaborate, exchange feedback, and share files.
- Implemented real-time chat and notifications using **SignalR**.

Healthcare Booking System (University Project)

- Full-stack system for managing appointments between patients, clinics, and doctors.
- Backend built with **ASP.NET Core Web API**, frontend dashboards with **Angular**, and a **Flutter** mobile app for patients.
- Implemented secure authentication and real-time scheduling across multiple user roles.

Education

BSc: Bachelor's in computer engineering, The Islamic University of Gaza (2020 – 2025)
